TROOPTOTASK

SSG ROBERT BADDELEY, MEDDAC-AK · ARCTIC ASCENT 2026

Less admin. More time with Soldiers.

EVERY REQUIREMENT COSTS TIME.

Admin readiness and mission training draw from the same hours. It's zero-sum.

- **Inheriting Soldiers.** Same data sheets, vehicle info and packets, collected all over again.
- **Command & staff slides.** AFT, quals, 350-1, taskings, chased by text because the tracker is a week old.
- **The share drive.** Five copies of “Master Tracker copy of copy (1).xlsx”, three locked, formulas broken.
- **Taskings on a whiteboard.** “Need 2 for the CSM detail Thursday.” 45 minutes of texts, same two Soldiers again.
- **Duty rosters without a DA 6.** Staff duty every month for you; seven months off for your buddy.
- **2021 Day in the Life study.** Training wasn't happening. Team leaders were busy carrying admin up and down.

IT'S NOT THAT LEADERS DON'T CARE. KEEPING TRACK IS A JOB OF ITS OWN.

● AVAILABLE TODAY

CALENDAR

WHO'S WHERE. EVERY DAY.

- **Never uninformed.** CQ, Staff Duty, who's at school, on leave, TDY, all at a glance. Events & Taskings integrations imminent.
- **Prioritizes ease of use.** Click a cell to add a day, click and drag to cover a range. No training required.
- **Duty that picks fairly.** Longest since last duty comes first, anyone away is dimmed, and you can filter by rank, role and MOS. Coming soon: AR 220-45 compliant automatic DA6 generation.

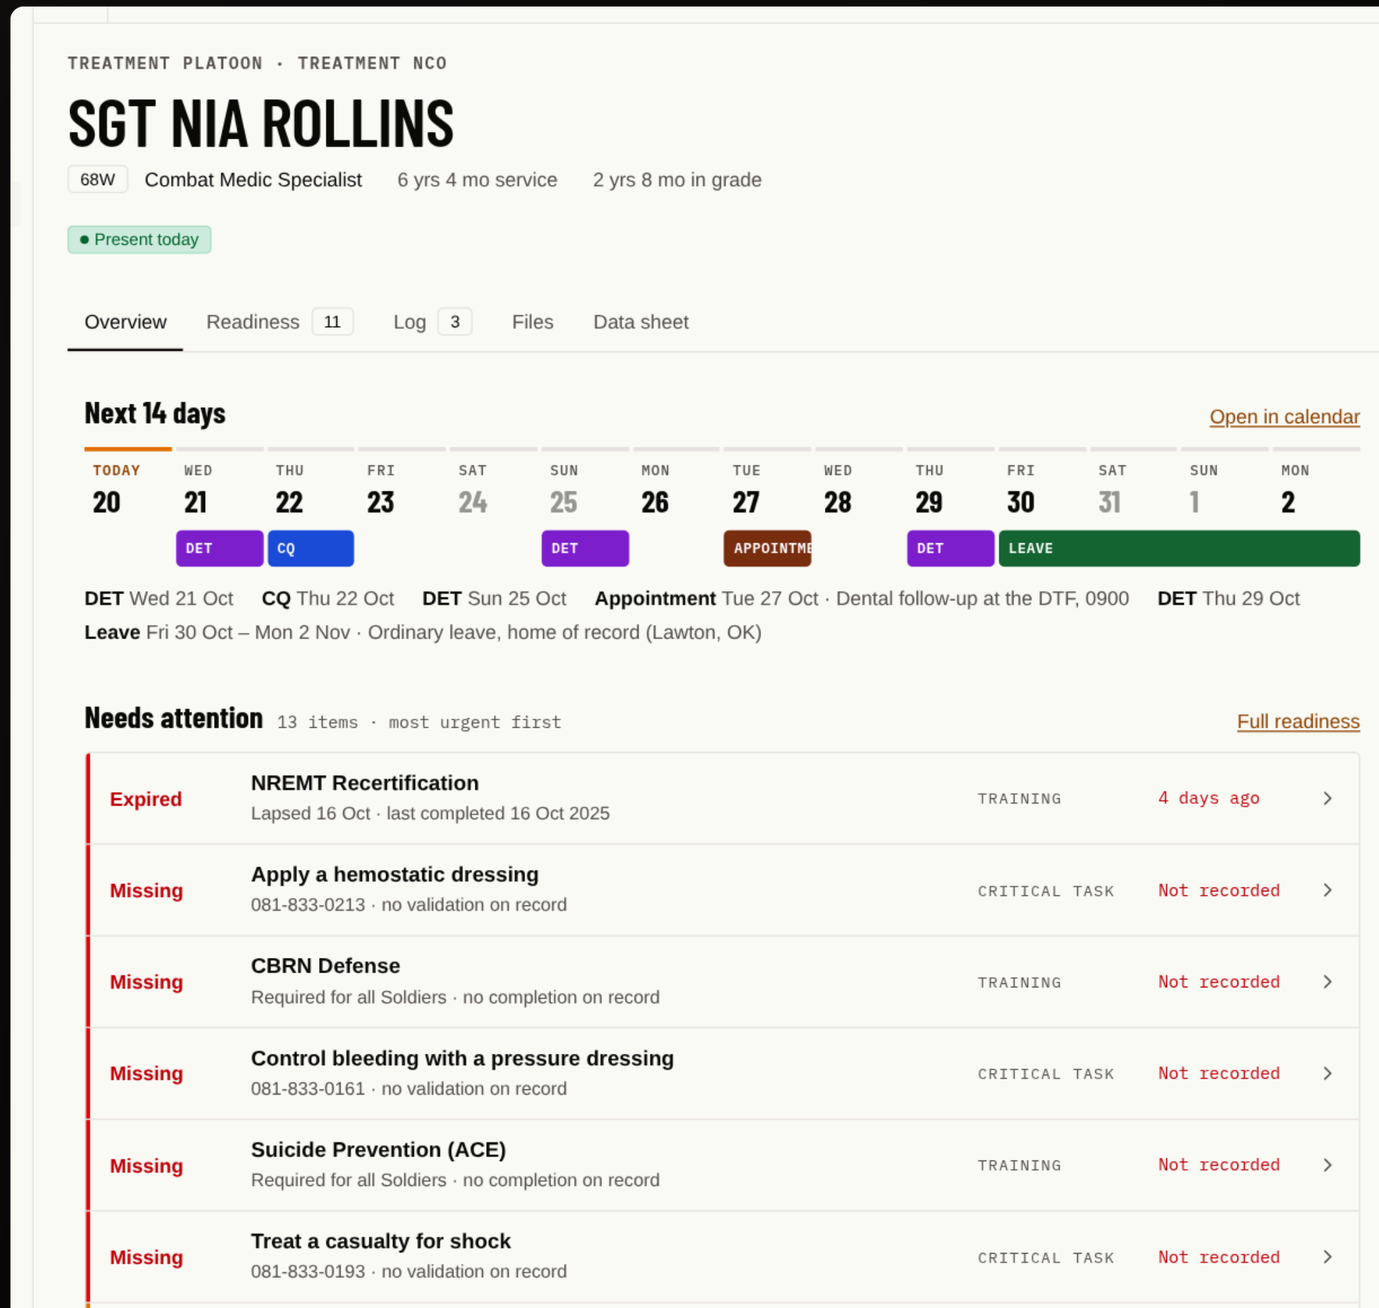

● JUST LANDED

PERSONNEL DETAILS

EVERY SOLDIER. ONE PAGE.

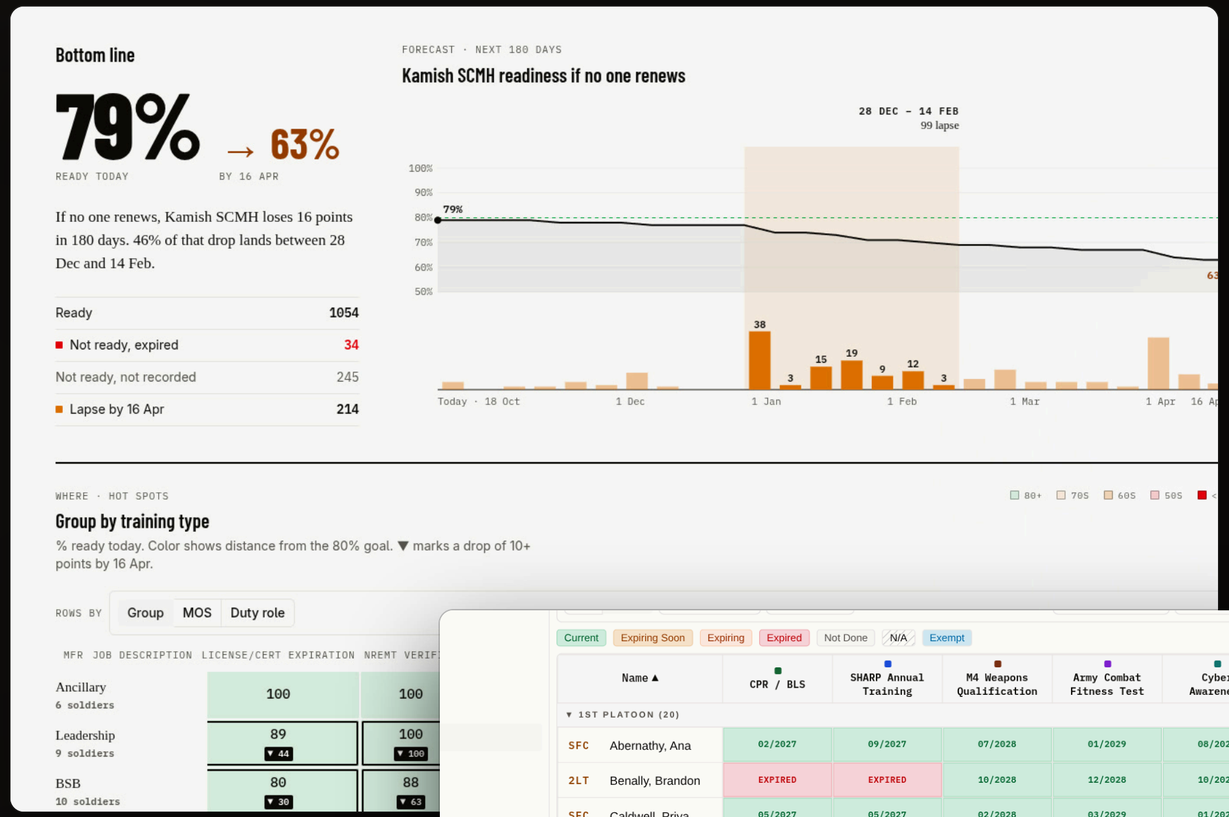

- **The next 14 days**, straight from the Calendar.
- **Needs attention, most urgent first.** Training, NCOERs, pending ETS/DEROS. Start the work before it's an emergency.
- **Log it where you see it.** Snap the certificate and see the new expiration before you save.
- **Follow-ups, notes and counselings** on the same page.
- **Soldier Data Sheet always available.** Emergency contacts, MOPP sizes. The classic data sheet, digitized.

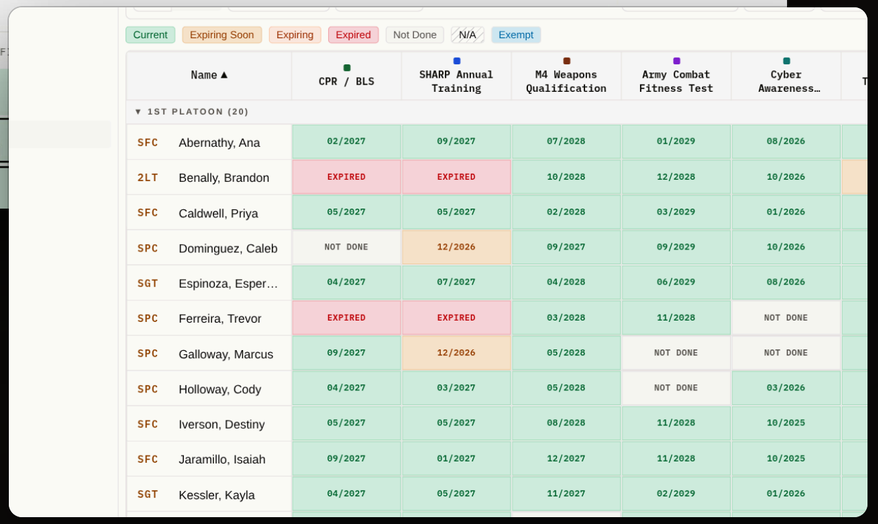

TRAINING · TRAINING REPORTS

PROJECT DROP-OFFS, MAXIMIZE TRAINING IMPACT.

- **Every Soldier, every requirement.** One matrix that tracks what YOU want visibility on. 350-1, WTBDs, AFT/CFT & Quals.
- **Set the standards.** You decide who it applies to by rank, position, or MOS and decide when/if it needs renewal.
- **Forecast up to 180 days.** Forecast the greatest drop-offs to maximize training impact where it matters.
- **Ready to brief.** Print it or export it to Excel. Coming soon: PowerPoint

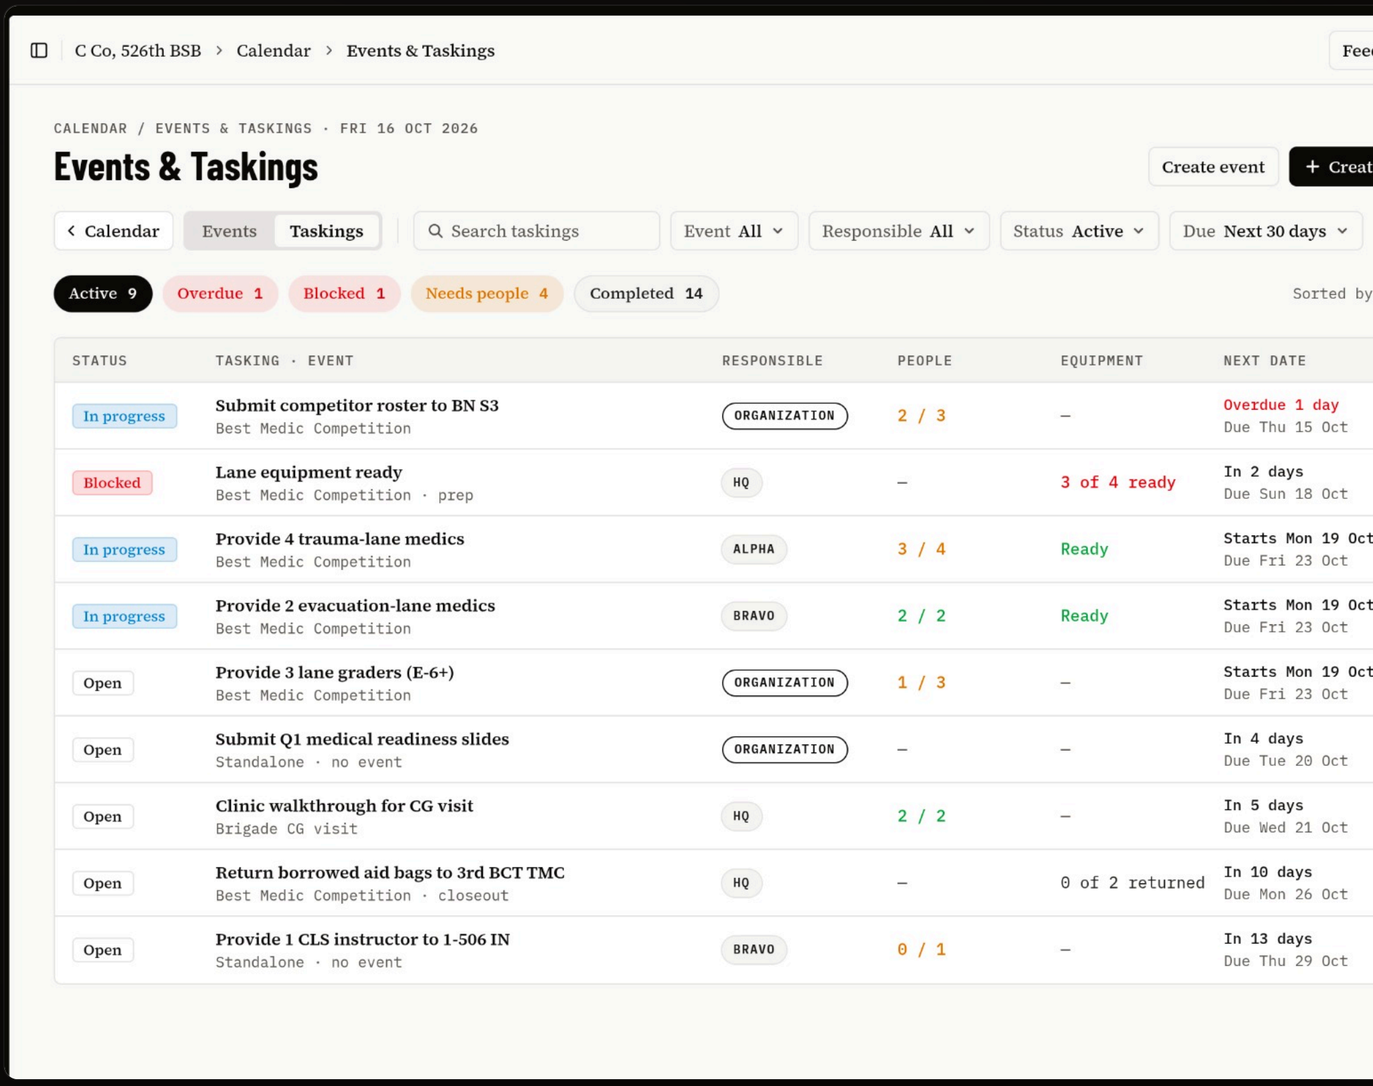

○ IN DESIGN

EVENTS & TASKINGS

EVERY TASKING. TRACKED TO DONE.

- **From the FRAGO to a plan.** An event holds its taskings before, during and after.
- **Scoped to who owns it.** Each tasking goes to a Group, or stays with the whole unit.
- **Staff it without the phone tree.** Leave, TDY and other taskings show before you commit anyone.
- **Overdue, blocked, short people.** Prioritize efforts where they're most needed.

○ IN DEVELOPMENT

DROP ZONE · AI ACROSS THE PLATFORM

JUST SAY IT.

- **Brain dump in, updates out.** Talk or paste. TroopToTask finds the changes and actions for you to approve.
- **Scoped like everything else.** It only sees and changes what you can.
- **Administrative burdens reduced to seconds.**

TALK TO YOUR UNIT DATA AND T2T WORKS FOR YOU

ASK	“Who can make the range Tuesday?”
BRIEF	“Build my training meeting slides.”
FORECAST	“Who still needs their AFT and Weapons Qual before JPMRC?”

● YOU, AT THE RANGE WITH ONLY YOUR PHONE

“Okafor is on leave Wednesday through Friday. Patel recerted CPR this morning, and I still need one more medic for the trauma lane Monday.”

↓ 3 CHANGES FOUND · REVIEW BEFORE SAVING

CALENDAR · ADD STATUS
SGT Okafor, Daniel ✓ NO CONFLICTS
Leave · Wed 21 – Fri 23 Oct

TRAINING · LOG COMPLETION
SPC Patel, Ravi ✓ CURRENT TO OCT 2028
CPR / BLS · completed today

TASKINGS · ASSIGN PERSON
SPC Fischer, Ana ✓ FILLS 4 OF 4
Provide 4 trauma-lane medics · Mon 19 Oct

Nothing changes until you approve.

Approve 3 changes

SECURITY · ACCESS

BUILT TO MAXIMIZE SECURITY.

- **Scoped access, enforced by the server.** Organization-wide or by Group, set per feature: none, view, operate or configure. Only see what they need to know.
- **Viewer, Operator and Editor presets**, with per-feature overrides. Archive and delete requests need approval so a bad actor can't wreak havoc.
- **Separate Organizations.** One account can switch between units, and their data never mixes.
- **Encrypted** in transit (TLS 1.2+) and at rest (AES-256). Files open through 5-minute private links.
- **2FA, Password complexity requirements**, and a re-verification for sensitive actions. Audit log kept for a year.
- **Aligned with NIST 800-171** on SOC 2 Type II hosting. FedRAMP is the next step.

LESS TIME ON ADMIN.
MORE TIME WITH SOLDIERS.

THAT'S

READINESS.
